

COMPOSITION
Each softgel capsule contains:
Vitamin D3 (USP), 200,000 IU
Product complies with USP Specs.

DESCRIPTION:

Vitamin D3 is a hormone that has an important role in Calcium and Phosphorus metabolism. Technically, vitamin D3 is not a vitamin because the body can produce it also known as Cholecalciferol.

Molecular Formula: $C_{27}H_{44}O$
Molecular Weight: 384.648 g/mol

INDICATIONS

- For the treatment of vitamin D deficiency or insufficiency
- Refractory rickets (vitamin D resistant rickets)
- Hypocalcemia
- Osteoporosis
- Osteopenia
- Weight loss
- Dental caries
- Hair growth

DOSAGE

As directed by the Physician.

CONTRAINDICATIONS

Arteriosclerosis with occlusion of the arteries, Kidney stone, Kidney disease, Sarcoidosis, high amount of Phosphate in the blood, high amount of Calcium in the blood, excessive amount of vitamin D in the body.

ایڈوین-ڈی
وٹامن ڈی-3 (کولی کلسی فرول)
سوفٹ جیل کپسول

INTERACTIONS WITH OTHER MEDICATIONS

- Taking vitamin D along with Calcipotriene might increase the effects and side effects of Calcipotriene.
- Taking large amounts of vitamin D along with Diltiazem might decrease the effectiveness of Diltiazem.
- Taking vitamin D along with Digoxin might increase the effects of Digoxin and lead to an irregular heartbeat.

USE IN PREGNANCY AND LACTATION

In case of pregnancy and breast feeding ask to the healthcare practitioner regarding the risk and benefits of using this medication.

ADVERSE EFFECTS

- Dry mouth
- Headache
- Vomiting
- Fatigue
- Dizziness
- Trouble breathing

OVERDOSAGE

Too much vitamin D can cause an abnormally high blood calcium level, which could result in nausea, constipation, confusion, abnormal heart rhythm and even kidney stones. It's nearly impossible to get too much vitamin D from sunlight or from foods (unless you take too much cod liver oil).

STORAGE

Store below 25°C.
Protect from light, heat and moisture.
Keep all medicines out of the reach of children.
